Tips Given For Sewing

RALEIGH — Leather and suede coats are in style, but they are relatively expensive.

But with less money and a little time you can make a coat out of imitation leather or suede that will look very much like the real things, says Harriet Tutterow, extension clothing specialist, North Carolina State University.

Careful work is important on these materials for pin and needle holes may be permanent. So preplan and try not to make mistakes.

Alter your pattern before cutting the garment for changing seams later may be impossible, the specialist adds. Pin within seam allowances, not in the body of the garment, Miss Tutterow suggests. And mark materials with chalk, rather than with tailor tacks or tracing wheels that might leave holes.

For best results use polyester or polyester core thread and a size 14 needle, or a leather needle. These needles usually help eliminate skipped stitches.

But if you do have a problem with skipped stitches, try using a larger needle or a small-hole throatplate and straight-stitch presser foot. Or increase pressure on the presser foot.

For the best seams, use 10 to 12 stitches per inch.
