When The Rate Goes Up Again, Bump It Again.

When The Rate Goes Up, Bump The Rate Higher.

When The Rate Goes Even Higher, Bump It Even Higher!

**The Rate Watcher IRA.
Take Advantage Of A Good Rate Today,
And A Better Rate Tomorrow.**

CK Bank's 5-year Rate Watcher IRA lets you earn a very competitive rate today with the assurance that your rate will never go down. But the real advantage is, as interest rates go up, you can "bump" your certificate, to the new, higher rate at any three times of your choice, without extending the term. So, don't get locked into a regular

fixed rate IRA. Get a CK Rate Watcher and raise your rate, when rates go up.

YIELD	RATE

SPRING CAR CARE — WEDNESDAY, APRIL 3, 1991

Motorsports is the proving ground for automotive products

I would have guessed rather unlikely years ago that manufacturers of certain automotive parts would be using the race track as one of their primary proving grounds.

But, an increasing number of companies is putting an emphasis on motorsports as a way to demonstrate the quality and how their products respond to the rigors of racing.

The performance associated with auto racing is a natural choice for many manufacturers, tire companies, and oil companies.

Now, available for companies, in test and development products, can be used in a variety of ways. For example, Goodyear's One of Indy car, but racing car, shocks and struts, more oil with

high performance without sacrificing performance would be used in a variety of ways.

REFRIGERANT Lost Refrigerant 12 in your car's air conditioner safely and easily. "Charge" is a new, all-in-one unit which eliminates waste and mess. To recharge your car's engine and turn on the compressor, then screw the hose/actuator for fitting onto the air conditioner's low pressure fitting, and depress the actuator. Add refrigerant until the air emitted from the motor/thermostat and hose is the same as a new one. A somewhat difficult process.

The product is easy to use. Just run the hose/actuator over the air conditioner's low pressure side of the air conditioner, and screw the hose/actuator onto the low pressure side of the air conditioner. Then, depress the actuator. Add refrigerant until the air emitted from your car's air conditioner vent is about 40°-50°F. To check the temperature, use a common household thermometer.

Once you've recharged your air conditioner, drive the car for 10 minutes at a later date. Simply store the "Bunch n Charge" can in a cool, shaded place, convenient way to replace lost Refrigerant 12 in home window air conditioner units, refrigeration equipment and RV's.

Puzzled

We can help you figure it out.

FIRST: The amount on deposit in your existing IRA will not be affected (including interest earned)

SECOND: Even under the new rules, you can still take full advantage of IRAs as a qualified tax shelter

THIRD: You can always make non-deductible contributions to an IRA and defer taxes on any interest earned until retirement. Stop in and speak to us for full details about the Tax Reform Act and how it affects you.
