"One Body, One Spirit"

Those of us who have more than one child are often amazed at the differences in them. How could children created from the same genes possibly have such varied physical and emotional makeup? But just the same, we love each one.

God has promised us. His children, that He loves us all equally, regardless of the color of our skin, what language we speak, or whether we are crippled or whole. Our bodies are only the shells of the soul, and in actuality, we are all souls striving to learn and to grow, and to survive in this earthly existence. The Bible tells us that we are "one body, one Spirit."

Come to God's house and discover how unconditionally God loves you. Experience this, and your heart will be filled to overflowing with the peace and warmth that God has in store for those who follow His example.

Sunday Mark 9:2-13
Monday Genesis 6:1-8
Tuesday Genesis 6:9-22
Wednesday Genesis 7:1-24
Thursday Genesis 8:1-19
Friday Genesis 8:20-22
Saturday Genesis 9:1-17

Boat Owners Association Advice To Prevent Flooding, Sinking

Most recreational boat sinkings happen at the dock and are caused by a plumbing system failure which can be prevented, according to Boat Owners Association of The United States.

The 300,000-member organization has produced a free "Self-Inspection Guide to Prevent Flooding or Sinking at the Dock" to help skippers identify potential trouble spots.

Information Sought About Area Flim-Flam Operation

The Mooreville-South Iredell Crime Stoppers will pay a cash reward of up to \$1,000 for information that results in the arrest of the persons responsible for a recent flim-flam of an elderly Mooreville resident.

Crime Stoppers pays cash for information concerning any unsolved crime, the location to stolen property, illegal drugs or someone wanted by a law enforcement agency.

If you have information call crime stoppers at 663-7066.

Some tips from this handy free guide:

1) Equip all thru-hull openings below the waterline on your boat with seacocks, make sure they operate freely, and close them when you are leaving the boat for an extended period.

2) Inspect raw water intake hoses, air conditioner cooling water hoses, bait well connections, etc. to be sure all are in sound condition. Hoses, clamps, and fittings are all that is keeping water safely outside the boat.

3) Deck fittings, ports, hatches and inspection plates should be free of leaks. Boats often leak more above the waterline than below. A heavy rainfall or even an extended drizzle can sink a poorly maintained boat.

4) Make sure the bilge pumping capacity is adequate for the size of your boat. How much rain the boat can safely collect and how the boat is used are factors in choosing the proper number and size of bilge pumps.

5) The bilge pump discharge should be protected backpiping. If an unprotected pump discharge is submerged, water will flow into the discharge and through the pump, flooding the boat.

6) If your boat is equipped with a shore-side freshwater hookup, a pressure regulator should be installed where the water enters the boat. Some on-board water systems are not designed to handle city water pressure.
