we took this big V8 and put it in the '64 Chevy II...

Chevy II Nova 4-Door Station Wagon. Luggage carrier rack shown, optional at extra cost.

WOW!

A pretty potent mixture.

The car's the same size. As trim and easy to handle as ever.

But now you can have a full-grown V8 in it. A Turbo-Fire 283* that turns out 195 hp.

It's the kind of machine that doesn't take much coaxing to set in motion. (Especially when you consider it has over 60% more power than the Chevy II that won North America's toughest rally last spring—the Shell '4,000.")

And for '64 we've also added a choice of a 4-speed Synchro-Mesh transmission* with a floor-mounted shift.

But in case your tastes run somewhat milder, we should point out you have a pick of three other engines as well. The standard 4 (on 100 Series sedans), the standard 6 and a new 155-hp 6*.

And, whatever one you decide on, it's reassuring to know you're getting a car built with the pride and simple integrity of a Chevy II. (Upkeep has been even further reduced this year by such refinements as larger self-adjusting brakes.)

It's a simple matter to spot one of these '64's by styling touches like the new grille design and trim accents. But we'd like to suggest a more memorable way. Drop down to your dealer's and drive one.
